<b>Office Action Summary</b>	Application No. 10/090,870	Applicant(s) LAWSON ET AL.	
	Examiner Steve Alvo	Art Unit 1731	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, drawn to a method of decontaminating a fluid, classified in class 162, subclass 4.
- II. Claims 25-27, drawn to a method of killing microorganisms in an aqueous fluid, classified in class 422, subclass 22.
- III. Claims 29-39, drawn to an electro-potential cell, classified in class 205, subclass 701.
- IV. Claims 40-46, drawn to a method for increasing the strength of paper, classified in class 162, subclass 50.
- V. Claims 28 and 47, drawn to pulp, classified in class 162, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, IV and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Groups III do not require separating contaminants as required by Group I; increasing the strength of paper as required by Group IV; killing microorganisms as required by Group II.

Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

inventions Group I does not require increasing the strength of paper as required by Group IV or killing microorganisms as required by Group II. Group IV does not require separating contaminants as required by Group I or killing microorganisms as required by Group II. Also

Inventions I, II, IV and V are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product.

The product can be made by different processes such as the delignification of wood chips with kraft liquor and does not require separating contaminants as required by Group I, increasing the strength of paper as required by Group IV, or killing microorganisms as required by Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Kevin W King on 3-2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
